FireBase for Data storing

The screenshot shows the Firebase console interface for a project named "sample-express-app". The left sidebar contains navigation links for Project Overview, Firestore Database (selected), Performance, Product categories, Build, Release & Monitor, Analytics, Engage, All products, and Spark (No-cost \$0/month). The main content area features a large orange header with the text "Cloud Firestore" and the subtext "Realtime updates, powerful queries, and automatic scaling". A prominent "Create database" button is visible. To the right, there's a decorative graphic of three mobile devices with a magnifying glass focusing on one, and a callout at the bottom asking "Is Cloud Firestore right for you?".
